RACING FORCE GROUP

The Group

Racing Force is the leading Group in the Motorsport Safety Product Industry with the most advanced and complete range of protection & performance products used worldwide by top professionals, amateur athletes, racing teams and car manufacturers from Formula 1® to World Rally Championship®, Sportscar racing, Stockcar, Rally-raid and Karting. In the last ten years Racing Force Group won more than 60 FIA World Championship titles along with IndyCar®, NASCAR® and Supercars® Championships. In order to gain international visibility and boosting its development plans, Racing Force is now a dual listed company: since November 2021 is listed on the Euronext Growth Milan market (RFG), and since September 2022 it entered also into the Euronext Growth Paris market (ALRFG). Racing Force Group (RFG) lies in the breadth of our iconic brand portfolio, our people, our vendors and our customers. The Group's core moral principles and work ethics include values such as integrity, respect, dedication, determination, diversity, sound judgment, dependability, accountability, teamwork, loyalty, quality and safety. We obtain success through a positive mental attitude, optimism, vision, courage, proactiveness and passion: this is our strength.

RACINGFORCEGROUP

SAFETY & QUALITY FOR FIA

SIDE BY SIDE SINCE 2012

FIA Motorsport

For over a decade Racing Force Group and FIA have been committed side by side on roads and racetracks to guarantee the protection of the people of racing. This story began in 2012 with the first agreement between OMP and the motorsport's world governing body, and it developed into something even bigger as Bell Racing Helmets became involved as well in the partnership.

FIA Motorsport

Technical racing clothing for FIA officials and safety car drivers across a range of FIA world championships (from F1 down) comes exclusively from Racing Force Group: OMP fire retardant suits, shoes, gloves and underwear, and Bell helmets.

FIA Karting Academy

Moreover, since 2017 OMP brand has the honor to supply technical racewear to the young contestants FIA Karting Academy Trophy, the forge of tomorrow's motorsport champions.

CONSTANTLY
EVOLVING

SEVENTY YEARS OF
SERIOUS HEAD PROTECTION

In 2024, Bell Racing Helmets proudly celebrates its 70th anniversary. Now part of Racing Force Group, the brand is the world's leading manufacturer of state-of-the-art automobile and karting racing helmets designed for professional and amateur drivers.

The Bell name is synonymous with safety, innovation, performance and engineering excellence. Since 1954, when the company was founded in a suburb of Los Angeles, California, Bell helmets have been worn and trusted by legendary names in all forms of racing, including Formula 1, NASCAR, IndyCar and the World Rally Championship.

Bell's reputation has been enhanced over time by several innovations, pioneering solutions and new standards that have helped drivers not only be better protected, but also to perform better.

Bell Racing Helmets remains committed to working with the world's best drivers and organizations to progress helmet technology, with an endless willingness of being the premier choice in the industry.

SERIOUS HEAD PROTECTION

CONSTANT EVOLUTION

BELL HELMETS HISTORY

70 years of innovation in the world's most demanding sport

It Takes A Lot to Finish First

To get there, you need an amazing combination of cutting-edge technology, seamless teamwork, proven skill, dedication and unwavering nerve. It also takes a good deal of precaution.

As a company of first, Bell has never stopped the pursuit of serious head protection through innovation and a focus on the future. We were the first company to be Snell certified, introduce an energy absorbing liner system, build a full-face helmet, fire retardant helmet, aerodynamic helmet, anti-fog shield and homologate an FIA 8860 "super helmet".

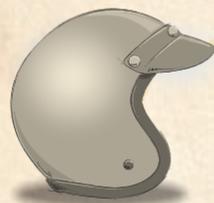

That same forward thinking defines everything we do and is exhibited in every high-performance racing helmet we build. Delivering the ultimate in protection, innovation, technology and reliability, it's no wonder why more champions have proudly worn Bell Helmets than any other brand.

Time Tested, Champions Trusted

For over 65 years, our commitment to innovative design and progressive approach to safety has defined Bell Racing.

That same attention to detail continues today throughout our entire line of products making each Bell helmet unique and worthy of being worn by the world's best drivers. The latest generation of Bell Racing helmets offer forward-thinking design, leading-edge technology, superior engineering, outstanding comfort and fit, enhanced ventilation and industry leading features with the latest material innovations and manufacturing techniques to create the most advanced line of racing helmets available in the world today.

PROVEN SINCE 1954

1954

MANUFACTURING BEGINS

Bell begins manufacturing its first helmet. (the '500') in a garage located behind Bell Auto Parts.

1957

500-TX

500-TX, the first motorsports helmet to use an energy absorbing EPS liner system.

Jimmy Bryan won the 1958 Indy 500 wearing the 500-TX, Bell's first Indianapolis 500 win.

1966

STAR

Bell introduces the world's first full-face helmet (the Star).

Dan Gurney was the first driver to use the Bell Star in auto racing competition in 1968.

1973

STAR FX

Bell introduces the Star FX, the first fire retardant auto racing helmet.

1978

STAR FX STAR XF DUAL EYEPORT

The first dual eyeport helmet, Star XF is introduced.

1979

XFM-1

The XFM-1 was the first lightweight composite auto racing helmet. It became the helmet of choice for open-wheel drivers everywhere.

1991

AFX-1

The AFX-1 was the first all Kevlar helmet and the first to feature a ventilation system that incorporated chin bar vents and top vents to create airflow through the helmet.

1992

VORTEX

This is the first ever helmet with aerodynamic elements including trip strips and vortex generators to reduce helmet buffeting in open-wheel environments.

1993

M3

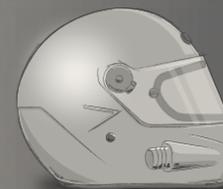

The M3, a multi-use lightweight helmet combined classic Bell features with bold European styling to create a universal design that could be used world-wide in all forms of racing.

1993

FEULING SS

The first aerodynamic helmet for speeds well over 320 kph, Feuling SS featured a front lip and rear wicker that reduced lift and buffeting. Feuling SS first used in 1993 at the Indy 500.

1996

VORTEX TURBO AIR

The Vortex Turbo Air was the first auto racing helmet to feature internal high-speed fans that directed airflow to the face and the shield for comfort and to prevent shield fogging.

1997

DOMINATOR

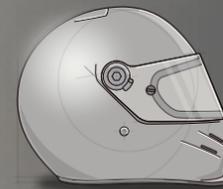

The Dominator is introduced, the first helmet with gurneys built into the shell for enhanced aerodynamic performance in a compact design.

1998

FEULING II

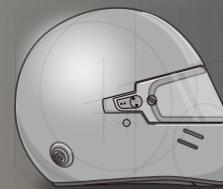

Bell introduces the Feuling II, a redesigned version of the Feuling SS to fit new advanced headrests designed for open wheel racing, featuring a smaller profile and aerodynamic signature.

1999

KF1

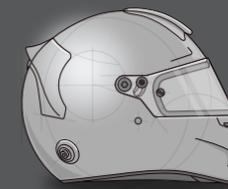

The KF1 is the first helmet to feature full integration of the edge of the shield into the helmet shell for improved aerodynamic performance.

2004

HP1

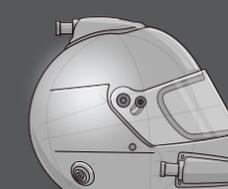

Bell's HP1 is the first helmet to be homologated to the FIA8860 advanced helmet standard and used in F1 competition.

2007

HP3

This model features an ultra-lightweight carbon shell and advanced energy-absorbing liner. A front lip provides aerodynamic stability and air vents maximise airflow inside.

2010

BR1

Bell's BR1 is the first forced air helmet design for use in either a side or top air configuration using a kit system.

2011

HP3 Visor Panel

Bell is the first company to homologate and use a Zylon Visor Panel in F1 competition

2014

HP7

Bell introduces the HP7 featuring an innovative shell and integrated shield design, moving the pivot locations down and forward to improve acoustic and aerodynamic performance while enhancing energy management capacities.

2019

HP77

Bell introduces the HP77, the first helmet in the world featuring a ballistic reinforcement incorporated into the shell and replacing the visor panel.

2021

HP10 RALLY

After 2 years of intense Research & Development with the best drivers and best teams, Bell comes back in World Rally Championship, setting new levels of comfort, performance and acoustic qualities thanks to ZeroNoise™ electronics.

SPORT

At Bell, we know racing and we know it is a serious business. For CIRCUIT racing, we offer a complete line of FULL FACE helmets, from the Advanced HP77 chosen by a majority of Formula One drivers to the GT5 Sport, the helmet of choice for occasional racers.

Some models are declined in various versions:

- The Advanced Series helmets (HP) use ultra-lightweight aerospace grade carbon shell combined with a high-performance multi-density energy absorbing liner system delivering the ultimate protection. They are the pinnacle of technology and innovation, representing the best of Bell.
- The Carbon Series helmets feature a lightweight carbon shell and deliver the best performance to value ratio in motorsport.
- The Pro Series helmets, with their lightweight composite shell, are designed for drivers at all levels of racing who expect industry-leading performance, professional features and the latest engineering advances.
- The Sport Series helmets are intended for amateur racers who do not want to compromise on safety and comfort.

* Driver's Eye™ is the world's first and only FIA homologated micro camera system to be integrated into a racing helmet. Driver's Eye™ is a patented technology of Zeronoise that provides the audience with a unique point of view of the driver on the racetrack. Zeronoise is the electronics division of Racing Force Group that designs and manufactures high-end custom technologies.

FULL FACE HELMETS
CIRCUIT

The HP77 is based on Bell's highly successful and multiple F1 World Champion proven HP7 design. Chosen by a majority of top professional open cockpit racers, the HP77 provides the most advanced protection, featuring a very narrow eyepoint on top of which high strength ballistic materials have been incorporated. Following a long tradition of innovation, the HP77 was the first helmet to meet the latest FIA8860-2018-ABP standard. It is renowned for its lightweight, aerodynamic qualities, superior cooling and amazing defogging system for the intense demands of open-cockpit forms of racing in all types of weather. The HP77 is homologated to the FIA8860-2018 ABP standard, the most rigorous sport helmet standard on the planet, designed for professional formula racers competing at the highest levels of the sport.

- Full face helmet featuring High-strength and High-modulus carbon fibres ultra-lightweight FIA8860-2018 ABP shell
- Very narrow eyepoint
- Frontal area with integrated ballistic materials for added protection from flying debris
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) shield for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 12 air intake and extraction channels for maximum ventilation
- Air intake system includes two part centre and low profile on sides (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Integrated channels in face piece offering multiple options to install drink tube and communication systems
- Top spoiler, top and chin bar gurneys available separately
- Factory installed Hans anchors as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Available with frontal chinbar hole for the introduction of the drinking tube (optional special order)
- HP helmet bag included
- Shield and pivot kit: SE077 3MM, SV(SE07)
- Interior: Dark Grey High Strength – High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Matte finish
- Sizes: 54-55-56-57-58-59+
- Homologation: FIA8860-2018-(ABP)

HP Helmet Bag included

Developed through close collaboration with leading F1 drivers and teams, the carbon fiber HP7 is aerodynamically sleek, lightweight and efficient for the intense demands of all forms of racing. Meeting FIA8860-2018 "Advanced Helmet" standard, the HP7 is also equally popular amongst professional drivers in open-cockpit cars and closed Sports cars and GT cars, thanks to its very high level of comfort. For professional drivers competing in high-speed forms of motorsports, the HP7 allows racers to take advantage of the latest technological innovations including aerospace composite materials and advanced energy absorbing liner systems.

- Full face helmet featuring High-strength and High-modulus carbon fibres ultra-lightweight FIA8860-2018 carbon shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) shield for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 12 air intake and extraction channels for maximum ventilation
- Air intake system includes two part centre and low profile on sides (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Integrated channels in face piece offer multiple options to install drink tube and communication systems
- Top spoiler, top and chin bar gurneys available separately
- Factory installed Hans anchors as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Available with frontal chinbar hole for the introduction of the drinking tube (optional special order)

Incorporating technology used in our state-of-the-art HP7 Advanced Helmets, the HP6, with its modern and aggressive design, has been developed for racers in closed-car environments, featuring a wide eyeport for extended vision with an ultra-lightweight Advanced carbon shell. Its ventilation slots can be connected to various types of air intakes for external cooling systems. It can be fitted with optional earcups providing optimal noise insulation, with fully integrated radio communication kit and hydration systems (available separately or in RD version).

- Ultra-lightweight FIA8860-2018 Advanced full carbon shell
- Wide eyeport opening for optimal vision in closed cockpit cars (Shield type SE06)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Extraction vents to maximize cooling and air circulation
- Factory installed Hans anchors as original equipment
- Optional Top forced air intake can be installed on the left or right top side vents - available for use with and external cooling system
- Forced air kits available for aftermarket including quick lock (V10) and are fully compatible with Maglock
- HP helmet bag included
- Interior: Dark Grey High Strength – High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)

- HP6 and GT6 are compatible with interior parts kits - HP6 RD to incorporate the radio kit and drinking tube kits

Check all the options in the accessories section

- Same characteristics as HP6 with fully integrated radio communication kit and hydration systems.
- ZeroNoise® noise cancelling microphone integrated in face piece
- Coil style (curly cable) with heavy duty In-Molded Male Nexus Connector (4 pins)
- RCA connector compatible with Earplug Transducers (Various types of ZeroNoise® Transducers available as accessory)
- Hydration system (drinking tube) with fast release connector
- Compatible with earcups for increased noise insulation

DRINKING TUBE KIT

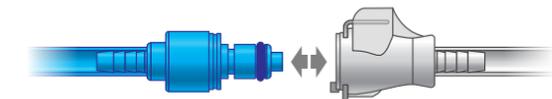

The integrated drinking tube kit includes flexible tubing, L shaped adaptor to properly position the mouth bite valve and a one-way valve for drinking systems. This allows for seamless integration without modifying the face piece or drilling holes in the helmet chin bar (bite valve and drinking system not included).

- RCA connector compatible with Earplug Transducers

- 1/8 Hose Barb Valved In-Line Coupling Body fast connector

HP6 RD

MICROPHONE KIT RCA-CINCH

Bell's 4 connector radio helmet kit features a dynamic noise canceling microphone pre-wired and integrated into the helmet's face piece and optimized to work with industry standard radio systems. The kit includes a coil style cord and ready for use with "in-ear" transducers (ear buds) fitted with RCA-CINCH Female Connector.

Based on the innovative HP7 design and featuring an ultra-lightweight carbon shell, the RS7 Carbon provides racers with unmatched acoustic comfort, aerodynamic performance and energy absorbing capacities. The sleek, aerodynamic design features an advanced ventilation system with 14 air intake and extraction channels for maximum airflow and ventilation.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Rear spoiler, top and chin bar gurneys available separately
- Top air attachments available separately
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet

SERIOUS HEAD PROTECTION

GTX3 CARBON

1207A02 to 1207A08

SIZES: 57 TO 61+

The versatile GTX3 Carbon, used extensively on dirt race tracks around the globe provides industry-leading performance and is a perfect choice for racers competing in open wheel forms of motorsports, especially dirt-track forms of racing. Featuring an ultra-lightweight carbon shell, integrated rear spoiler for enhanced aerodynamic performance at higher speeds, venturi air-exchange system, and double screen anti fog (DSAF) shield, the GTX3 Carbon is ideal for dirt track and other challenging forms of racing.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Rear-facing side chin bar vents and air extraction vents create a venturi-effect to minimize dirt and dust entering the helmet while maximizing air exchange
- Integrated carbon look rear spoiler for enhanced aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Factory installed Hans anchors as original equipment
- Shield and pivot kit: SE03 3MM, SV(SE03/SE05)
- Interior: Dark Grey High Strength – High Comfort FR Fabric

CIRCUIT FULL FACE HELMETS

1206A02 to 1206A08

SIZES: 57 TO 61+

Combining iconic F1 styling, versatile air-intake system, Ultra-lightweight carbon shell with leading edge aerodynamics, the GP3 Carbon is a visually appealing high performance helmet. Optimized for open-wheel, formula drivers, karters and other circuit racers who demand professional features, performance and comfort, the GP3 Carbon provides maximum ventilation and clear visibility making it suitable for use in the most diverse and demanding racing environments.

- Full face helmet featuring ultra-lightweight Premium carbon composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Versatile ventilation system featuring lower front chin bar ventilation and upper air-intake vents that can be opened and closed
- Front duckbill (chin spoiler) for improved aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- Factory installed Hans anchors as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet

Based on the HP7 design and featuring a lightweight carbon fiberglass composite shell, the RS7 uses an innovative shell and shield design to improve acoustic comfort, aerodynamic performance, and energy absorbing capabilities. The sleek, modern design features an advanced ventilation system with 14 air-intake and extraction channels that can be used with or without air-intake (available separately). The RS7 double screen anti-fog (DSAF) visor and rubber gasket seal ensure air, water and dust will not enter in the eyeport.

- Lightweight Premium Carbon Fiberglass Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise, and enhance energy management capacities
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Factory installed Hans anchors as original equipment
- Air Intake, side air extractors, rear spoiler, top and chin bar gurneys available separately
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Interior: Dark Grey High Strength – High Comfort FR Fabric
- Shield and pivot kit: SE07, SV(SE07)
- Color: White or Matte Black
- Available as well with exciting and trendy Graphics and Matte finish:
 - Stamina Red
 - Stamina Grey
- Sizes: 54-55-56-57-58-59-60-61-61+
- Homologation: FIA8859-2015 & SNELL SA2020

MANUFACTURER: BELL RACING HELMETS
MODEL: RS7-20
HOM. NO.: PH.082.20-C
FIA STANDARD: 8859-2015

Stamina:

“The ability to sustain prolonged physical or mental effort”

A name synonymous with Force. Strength with great impact. The overall design of the helmet represents this strength and vigor with sharp and angular shapes, combined with a modern and geometric aesthetic.

- Same characteristics as RS7 PRO with attractive colour design
 - Stamina Red
 - Stamina Grey
- Sizes: 54-55-56-57-58-59-60-61-61+
- Homologation: FIA8859-2015 & SNELL SA2020

The GT6 PRO features the same modern and aggressive design as HP6, developed for racers in closed-car environments, featuring a wide eyeport for extended vision with a lightweight premium carbon fiberglass shell. Its ventilation slots can be connected to various types of air-intakes for external cooling systems. It can be fitted with optional earcups providing optimal noise insulation, with fully integrated radio communication kit and hydration systems (available separately or in GT6 RD Carbon version).

- Lightweight Premium Carbon Fiberglass Composite shell
- Wide eyeport opening for optimal vision in closed cockpit cars (Shield type SE06)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Extraction vents to maximize cooling and air circulation
- Factory installed Hans anchors as original equipment
- Optional Top forced air intake can be installed on the left or right top side vents - available for use with and external cooling system
- Compatible with interior parts kits - HP6 RD to incorporate the radio kit and drinking tube kits
- Interior: Dark Grey High Strength - High Comfort FR Fabric
- Color: White or Matte Black
- Sizes: 54-55-56-57-58-59-60-61-61+ 2XL(63-64)-3XL(65-66)-4XL(67-68)
- Homologation: FIA8859-2015 and SNELL SA2020

The new GT5 SPORT is a versatile modern helmet designed primarily for entry level racers who demand quality and performance at a value price. It can be used as a large eyeport helmet with a standard shield or as an open helmet with an adjustable visor peak (optional), combining the feel of an open-face with the protection of a full-face model. The perfect helmet for racers just entering the sport on a budget, it is equally suited for closed cars or open cockpit machinery.

- Fiberglass Composite shell
- Wide eyeport (Shield type SE05)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Integrated channels in face piece offering multiple options to install drinking tube, valves and radio systems
- Ventilation channels
- Available with or without Hans anchors as original equipment
- Interior: Black FR fabric
- Color: White
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015

The GP3 combines traditional F1 styling, a versatile air-intake system, a double screen anti-fog (DSAF) visor and carbon-glass composite shell with leading edge aerodynamic performance. A great option for open-wheel, formula racers and karters who demand professional features, performance, and comfort, the GP3 provides maximum ventilation and clear vision in even the toughest track conditions.

- Full face helmet featuring Premium carbon-glass composite shell
- Advanced multi-density, multi piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) visor for anti-fog control and superior visibility
- Versatile ventilation system featuring lower front chin bar ventilation and upper air-intake vents that can be opened and closed
- Front duckbill (chin spoiler) for improved aerodynamic performance
- Integrated channels in face piece offer multiple options to install drink tube and radio systems
- M6 terminals for FHR anchor attachment and homologated for use with approved head and neck devices
- Available with or without FHR anchors fitted as original equipment
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE03 3MM, SV(SE03/SE05)
- Colors: White and Matte Black
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015

Bell's new X-1 all-terrain, extreme helmet is an FIA approved, motocross style racing helmet with Hans anchors for use with head and neck restraint devices that can be worn in multiple disciplines including car-cross, kart-cross, auto-cross, UTV and other forms of off-road racing. The X-1 features a lightweight composite shell, wide-eyeport for use with goggles, sun peak, removable and washable interior, removable rubber breath deflector seal, and chin filter insert to help prevent dust from entering the front chin vents. Ready to take on all surfaces, the Bell X-1 is a purpose-built racing helmet designed for the most demanding off-road environments.

- Lightweight premium composite shell
- Wide eyeport suitable for use with motorsport goggles
- Preinstalled short sun peak
- Easy removable and washable interiors
- Removable rubber breath deflector seal fitted on helmet + rubber breath deflector seal cover flat supplied on the box.
- Front vents on the chin studied to provide fresh air flow to the driver
- Rear air extraction vents
- Color: White
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015

MANUFACTURER: BELL RACING HELMETS

FIA STANDARD: 8859-2015

NEW

DIRT
OFF-ROAD

VENTILATION

Front vents on the chin studied to provide fresh air flow to the driver.

Removable breath deflector

The removable rubber breath deflector seal allows to modify the free space between the goggles and the helmet, allowing to control the air intake and perfect fit of any goggle.

SUITABLE FOR USE WITH MOTORSPORT GOGGLES

The wide eyeport allows the use of practically all goggles on the standard market.

The design of the helmet ensures the perfect fixation of the goggles, avoiding any possible movement so goggles stay firmly in place during the race.

COMPLETELY REMOVABLE AND WASHABLE INTERIOR

- Special fabric easy to wash and ultra-fast drying.
- Fit pad with bracket anchoring system for a quick assembly and disassembly.
- Cheek pad with velcro system.
- Removable chin dust filter .

Fast bracket anchoring

Cheek pad with velcro system

Special designed dust filter that installs in the front face piece available as accessory

Rally is one of the most challenging racing sports, putting cars and drivers through the toughest and the most varied conditions. To face all these challenges, Bell Helmets and Zeronoise, the electronic division of our group, developed a completely new line of sophisticated rally helmets with the help of top professional rally drivers and teams. Our new rally helmets deliver premium quality and high performance features such as lightweight composite shell, superior comfort and fit, ultra-high quality intercom systems, noise reducing ear protections, soft ear cups combined with ultra-thin and powerful speakers, advanced styling, and of course, optimal protection.

RALLY

The new Bell HP10 RALLY WW features more technology than ever with the integrated ZeroNoise® Wired-Wireless system. The helmet supports both communication technologies, traditionally wired, and wireless, all rolled into one, without any external elements. Everything is seamlessly integrated: connector, wireless module, battery, and even the well-known ZeroNoise® adaptive noise cancelling algorithm. That means that the helmet is still fully compatible with any other intercom in the market.

The WW (Wired-Wireless) system switches automatically between the two communication technologies without any intervention or interruption. The military-grade wireless module guarantees super-fast communication and a generous distance range of connectivity.

- Open face helmet featuring ultra-lightweight FIA8860-2018 Advanced full carbon shell
- Fast Removable Carbon Half Chin Bar (HCB) quickly and easily detachable to ensure fast access to breathing ways without the need to remove the helmet in case of emergency
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Adjustable carbon sun peak
- Adjustable integrated anti-scratch sunscreen: ML Red mirror (M10) fitted as original equipment + dark smoked (M10) supplied in the box
- Removable cheek pads with multi densities advanced materials for optimal comfort
- Flexible yet sound insulating integrated ear muffs for comfort combined with sound insulation
- ZN WW audio system features integrated electronics inside the helmet with adaptive noise cancelling technology for improved WIRED communication
- ZN WW audio system provides wireless connectivity inside and outside the car, with seamless transition between Wired and Wireless mode, and professional audio quality
- Ultra-reliable heavy duty integrated Female Nexus Connector (compatible with other any other Nexus amplifier)
- Detachable right side-cover for smooth integration of the Female Nexus Connector
- Flat right side carbon cover supplied in the box, for those who prefer using a straight cable coming out of the helmet instead of the integrated connector
- Air extraction holes to maximize cooling
- Factory installed Hans anchors as original equipment
- HP helmet bag included
- Interior: Dark Grey High Strength – High Comfort FR Fabric
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Adjustable sunscreens available as accessories in various colors to ensure optimal visual comfort
- Color: Carbon, Matte finish
- Sizes: 54-55-56-57-58-59-60-61-61+
- Homologation: FIA8860-2018

NEW

HP10 RALLY WW

MANUFACTURER: BELL RACING HELMETS
 MODEL: HP10 RALLY
 HOM. NO.: AH.015.20-0
 FIA STANDARD: 8860-2018

HP Helmet Bag included

Adjustable Sunscreen

ML Red mirror fitted as original equipment

Flat right side carbon cover included

WIRED-WIRELESS (WW)

Wired-Wireless (WW) can either work like a standard Nexus wired helmet, or go completely Wireless.

HP10 RALLY WW,
 MAG-10 RALLY CARBON,
 MAG-10 RALLY WW CARBON,
 MAG-10 RALLY PRO

FOCUS ON

* The WW (Wired-Wireless) system is installed in each HP10 Rally WW, and is also available on the MAG-10 Rally WW Carbon model.

RADIO KIT

WIRED MODE

The integrated Female Nexus allows the HP10 RALLY helmet to work as a standard wired helmet.

WIRELESS MODE

As soon as the cable is disconnected, the system switches to Wireless with no discomfort, or interruption in the communication.

Wireless Mode is enabled by ZN FEARLESS WW amplifier.

ZN FEARLESS WW

EARCUPS SPACER FOAM

Foam Spacers can be positioned behind the soft earmuffs to obtain the right level of pressure and insulation.

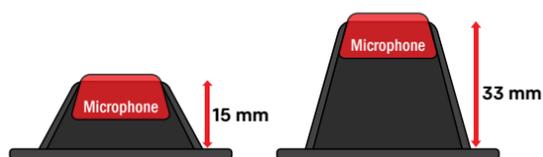

The kit with thicknesses (10 mm) is included in the box.

ADJUSTABLE MICROPHONE

The adjustable microphone pieces with different sizes allow a perfect fit of the microphone right in front of the mouth.

Two kits with different thicknesses are included in the box. 15 mm and 33 mm.

HALF CHIN BAR EMERGENCY FAST REMOVAL

The HP10 Rally WW, Mag-10 Rally Carbon, Mag-10 Rally WW Carbon, and Mag-10 Rally Pro feature an innovative and unique patented system, allowing to disconnect the half chin bar from the helmet very easily and quickly, without the use of any tools. In case of an accident, this unique feature allows the doctors and paramedics to immediately access the breathing airways of an injured driver, without having to remove the helmet. Simply lift the tab, and unscrew the tool-less red screw; once the screw is undone after a few turns, gently pull the half chin bar and that's it!

SIDE COVER CONNECTOR

Ultimate connection flexibility: The HP10 Rally WW, Mag-10 Rally Carbon, Mag-10 Rally WW Carbon and Mag-10 Rally Pro are delivered with a side cover integrating the Nexus female connector.

For those wanting the connector hanging on a loose cable, the connector side cover can easily be replaced with a flat cover.

Flat right side cover is included in the box.

FULL CHIN BAR KIT

The HP10 Rally WW, Mag-10 Rally Carbon and Mag-10 Rally WW Carbon can be transformed by removing the half chin bar (as installed) and adding full frontal chin protection with Bell's new 10 Series Full Chin Bar Kit. The part is available in carbon fiber finish and only compatible with the 10 series open face rally carbon helmets.

Full Chin Bar Kit is sold as an accessory. Not included in the box.

KARTING

SERIOUS HEAD PROTECTION

RS7-K

CARBON

1204A42 to 1204A51

SIZES: 54 TO 61+

The RS7-K Carbon is purpose-built for the karting enthusiast, offering a karting-only version of the RS7 series. It features a lightweight carbon composite shell, derived from the HP7 design, ensuring exceptional durability and performance. The innovative shell and shield design enhance aerodynamics and energy absorption capabilities. With its modern and sleek design, the RS7-K Carbon incorporates an advanced ventilation system for optimum airflow. It also includes a double screen anti-fog (DSAF) shield and a rubber gasket seal, providing reliable protection against water ingress during rainy conditions.

- Ultra-lightweight Premium Carbon Composite shell
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 3MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- RS7-K Carbon is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 3MM, SV(SE07)
- Interior: Non-fireproof lining for extra durability
- Black High Strength – High Comfort Fabric and synthetic leather
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Gloss finish
- Sizes: 54-55-56-57-58-59-60-61-61+
- Homologation: SNELL K2020

CARBON

KARTING

1205001 to 1205006

SIZES: 54 TO 59

Bell continues to innovate with the KC7 CMR Carbon, the first ultra-lightweight carbon youth karting helmet. Based on the advanced HP7 and incorporating the same carbon composite technology, this sleek, aerodynamic design features an advanced ventilation system with 14 air intake and extraction channels designed to maximize cooling and a double screen anti-fog (DSAF) insert to prevent fogging in rainy conditions. Certified to the FIA/Snell CMR standard designed for karting drivers under the age of 18, the KC7 CMR Carbon is a winning choice for the next generation of champion drivers.

- Ultra-lightweight Premium Carbon Composite shell: 1,095g in sizes 54 to 56 and 1,130g in sizes 57 to 59 (+ or - 3%)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Optical grade injected Double Screen Anti-Fog (DSAF) 2MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Air intake system includes two-part centre and side air intakes (installed)
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- KC7 Carbon is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07 2MM, SV(SE07) (This shield only fit the KC7 Range)
- Interior: Non-fireproof lining for extra durability
- Black High Strength – High Comfort Fabric and synthetic leather
- Alternative interior fabric colors: Tan, White, Red, Purple, Blue, Green, Neon Yellow, Pink and Orange (on special order)
- Color: Carbon, Gloss finish
- Sizes: 54-55-56-57-58-59

KC7-EV CMS EXTENDED VISION

The KC7-EV CMS is a lightweight youth karting helmet based on the F1 proven HP7 design platform, featuring a large eyeport for enhanced visibility. The sleek, aerodynamic design features an advanced ventilation system that can be used with or without air-intakes to maximize cooling and a double screen anti-fog (DSAF) visor to eliminate fogging. Homologated to the Snell/FIA CMS standard and certified for global competition, the KC7-EV is designed to minimize helmet weight for karting drivers under the age of 18 and perfect for the next generation of champions as they start their racing career in karting.

- Lightweight Carbon Fiberglass Composite shell: 1,185g in sizes 51 to 56 and 1,230g in sizes 57 to 59 (+ or - 3%)
- Advanced multi-density, multi-piece liner to maximize energy absorption and impact performance
- Extra large eyeport for enhanced visibility
- Optical grade injected Double Screen Anti-Fog (DSAF) 2MM visor for anti-fog control and superior visibility
- Powerful and effective top and chin bar ventilation system with 14 air intake and extraction channels for maximum ventilation
- Shell and shield design optimized to improve aerodynamic performance, reduce internal noise and enhance energy management capacities
- Rear spoiler available separately
- KC7-EV is NOT compatible with FHR anchor systems or devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Shield and pivot kit: SE07EV 2MM, SV(SE07) (This shield only fit the KC7-EV CMS)
- Interior: Non-fireproof lining for extra durability

SERIOUS HEAD PROTECTION

HELMETS

JIM BRYAN

BRYAN WON THE 1958 INDIANAPOLIS 500 WEARING A BELL HELMET

Bell Helmets pioneered the motorsport helmet in 1954 and made notable advancements in its design a few years later by introducing expanded polystyrene (EPS) foam

The 500-TX, one of Bell's earliest open-face helmets, was chosen by the Museum of Modern Art in New York for its exceptional design excellence

The 500-TX helmet holds the distinction of being the first helmet to receive Snell approval, which established a benchmark for product safety within the industry.

In 1966, Bell launched the world's first full-face motorsports helmet and quickly earned the admiration and support of the world's top motorsport racers and enthusiasts.

During the 1970s, numerous renowned drivers such as Jacky Ickx, Jackie Stewart, Niki Lauda, Gilles Villeneuve, and many others entrusted the protection of their heads to the Bell Star helmet

Fast-forwarding 50-odd years, Bell is once again introducing the 500-TX Classic and the Star Classic, much to the delight of dedicated classic car enthusiasts and historic car drivers

The same shape as the famous original Bell Helmets are reintroduced but produced to the last safety standard (FIA 8859/SNELL SA2020) using the latest production techniques and high tech materials.

SIZES: S, M, L, XL

Famous Bell Star design as worn by famous F1 drivers in the seventies. Fast-forwards 50-odd years and Bell is again launching this iconic helmet to the delight of true classic car enthusiasts and historic car drivers. The same shape as the famous original Bell Helmets are reintroduced but produced to the last safety standard (FIA 8859/SNELL SA2020) using the latest production techniques and high tech materials and featured in our special Bell Heritage White color with a gloss finish.

Classic open face helmet based on the famous Bell 500-TX. Fast-forwards 50-odd years and Bell is again launching this iconic helmet to the delight of true classic car enthusiasts and historic car drivers. The same shape as the famous original Bell Helmets are reintroduced but produced to the last safety standard (FIA 8859/SNELL SA2020) using the latest production techniques and high tech materials and featured in our special Bell Heritage White color with a gloss finish.

- Fiberglass composite shell
- Advanced one-density, single-piece liner to maximize energy absorption and impact performance
- M6 terminals for FHR anchor attachment and homologated for use with approved head and neck devices
- Synthetic rubber gasket seal to prevent dirt and water from entering the helmet
- Interior: Tan High Strength – High Comfort FR Fabric
- Shield and pivot kit: Clear Star Classic
- Smoked shield available as an accessory
- Color: Bell Heritage White
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015 & SNELL SA2020

- Open face helmet featuring fiberglass composite shell
- Provided with removable Peak
- M6 terminals for FHR anchor attachment and homologated for use with approved head and neck devices
- Interior: Tan High Strength – High Comfort FR Fabric
- Color: Bell Heritage White
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015 & SNELL SA2020

The Bell tradition of building high-quality open face helmets with classic styling inspired by the original Bell 500-TX lives on in the MAG-1. Designed for racers who enjoy the feel of a classic open face helmet, the MAG-1 delivers value and quality at an affordable price.

- Open face helmet featuring carbon-glass composite shell
- Advanced multi-density, multi piece liner to maximize energy absorption and impact performance
- Adjustable sun peak with antiglare sunscreen
- Factory installed Hans anchors as original equipment
- Color: White
- Sizes: S, M, L, XL
- Homologation: FIA8859-2015

NOZZLES

MAGLOCK

Inspired by the dust and heat of Baja, Maglock Air is a revolutionary way to connect racers helmets to their forced air systems. At the heart of this innovation, a machined magnet creates a solid, air tight sealed bond between air hose and helmet using 30 lbs of magnetic tensile force. Solid enough to endure the roughest rides, the connection can be easily broken by a single hand and small amount of pressure when disconnecting from an oblique angle for a "quick-release" extraction. Designed for fast driver changes and quick exit from a racing vehicle, Maglock is the latest innovation in racing safety and performance.

EASILY CONNECT

DRINKING TUBE KITS

The integrated drink tube kit includes flexible tubing, L shaped adaptor to properly position the mouth bite valve and a one-way valve for drinking systems. This allows for seamless integration without modifying the face piece or drilling holes in the helmet chin bar (bite valve and drinking system not included).

The new drinking tube has the same features as the standard drinking tube and incorporates a new quick connect valve that allows one-handed connection and disconnection.

FACTORY CUSTOM PAINTING SERVICE

Bell Racing offers factory custom painting with the guarantee that the painting will not affect the original protective qualities of the helmet. Each painted helmet comes with an official certificate, proving its conformity with the FIA safety regulations.

Our experience over the past years in painting the helmets of F1 and other professional drivers enables us to reproduce almost every possible design and colours.

1. POSITIONING THE HELMET ON YOUR HEAD

Put the helmet on by grasping the chin strap halves in each hand and pull the helmet on over your head.

HOW TO FIT A HELMET

1. POSITIONING THE HELMET ON YOUR HEAD

Put the helmet on by grasping the chin strap halves in each hand and pull the helmet on over your head.

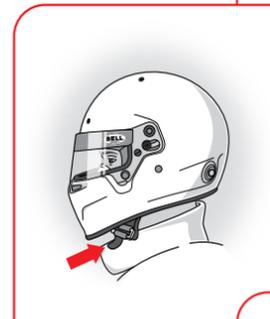

2. FITTING THE HELMET

When properly positioned, the helmet should be worn low on the brow eyes, near the center of the eye opening, touching the top of the head with uniform and firm pressure all around – tight without excessive pressure points.

To fasten the chin strap, thread the end of the strap through both d-rings, loop the strap end back through the inner d-ring and pull it comfortably tight against the throat. Make sure the chin strap is snug against the throat.

⚠ WARNING CORRECTLY USING THE CHIN STRAP

A good fit and a properly fastened chin strap are all that keep the helmet on your head during an accident. Make sure the chin strap is correctly fastened and pulled snugly up against your throat each time you wear your helmet.

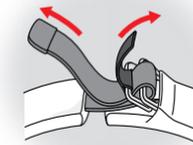

3. CHECKING THE FIT

Correctly position the helmet on your head and stand in front of a mirror. Gently rotate the helmet first from left to right and then from front to back. If the skin on your brow moves with the helmet as it is rotated, the fit is proper. If the skin on your brow does not move when the helmet is rotated in either direction, the fit is too loose. Try various sizes until you find one that fits correctly. With the helmet properly positioned, and the chin strap fastened, try to remove the helmet from your head. Grasp it securely and make a serious effort to roll it off your head in both the forward and backward directions. If you can remove the helmet or are able to roll the helmet backward far enough to expose your forehead or forward far enough to block your vision, the helmet either fits too loosely or the straps are not properly adjusted.

If the helmet is too large or if you can still remove the helmet, DO NOT use it and replace with a smaller size.

Repeat steps 1 through 3

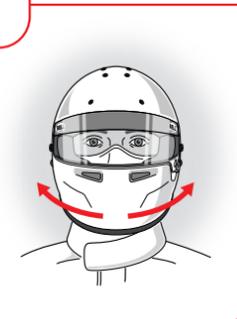

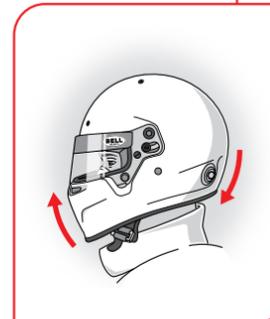

If you cannot remove the helmet and it does not roll either backward far enough to expose your forehead or forward far enough to block your vision, you have a proper fit. We recommend fitting the helmet with a head sock or balaclava if you intend to wear one in competition.

4. TEST DRIVE

Steps 1 through 3 are critical to getting the most out of your helmet. Spend as much time as necessary to satisfy yourself that you have a good fit. Only after successfully completing steps 1 through 3, put on your helmet and wear it for an extended period or take a test drive. If the helmet feels comfortable, remaining firmly in place and the straps remained properly adjusted, your helmet is ready to use. If the helmet feels uncomfortable or moves excessively, go through steps 1 through 3 as necessary to correct the problem. If you are unable to successfully complete all 3 steps, or if the helmet does not fit and feel comfortable, DO NOT continue to use the helmet. Either: Return to the dealer for assistance, or contact Bell Racing for further instructions.

Do not use chin cups or wear the strap on the point of the chin. This will increase the risk of the helmet coming off in an accident.

Zeronoise features the most advanced communication systems in WRC. With its adaptive sound technology ZN is able to deal with any car, surface and driver's preference. This technology translates into a full product range of intercoms and full integration with Bell and OMP helmets.

The integration of ZN with OMP and Bell, delivers top performances thanks to the combined effort of the R&D departments. This approach led to breakthrough innovations such as the one today known as the Driver's Eye, the smallest camera in the world for live TV broadcasting, FIA homologated, that brings the driver's POV to the audience.

THIERRY NEUVILLE - HYUNDAI TEAM

COMMUNICATION DEVICES

ZERONoise

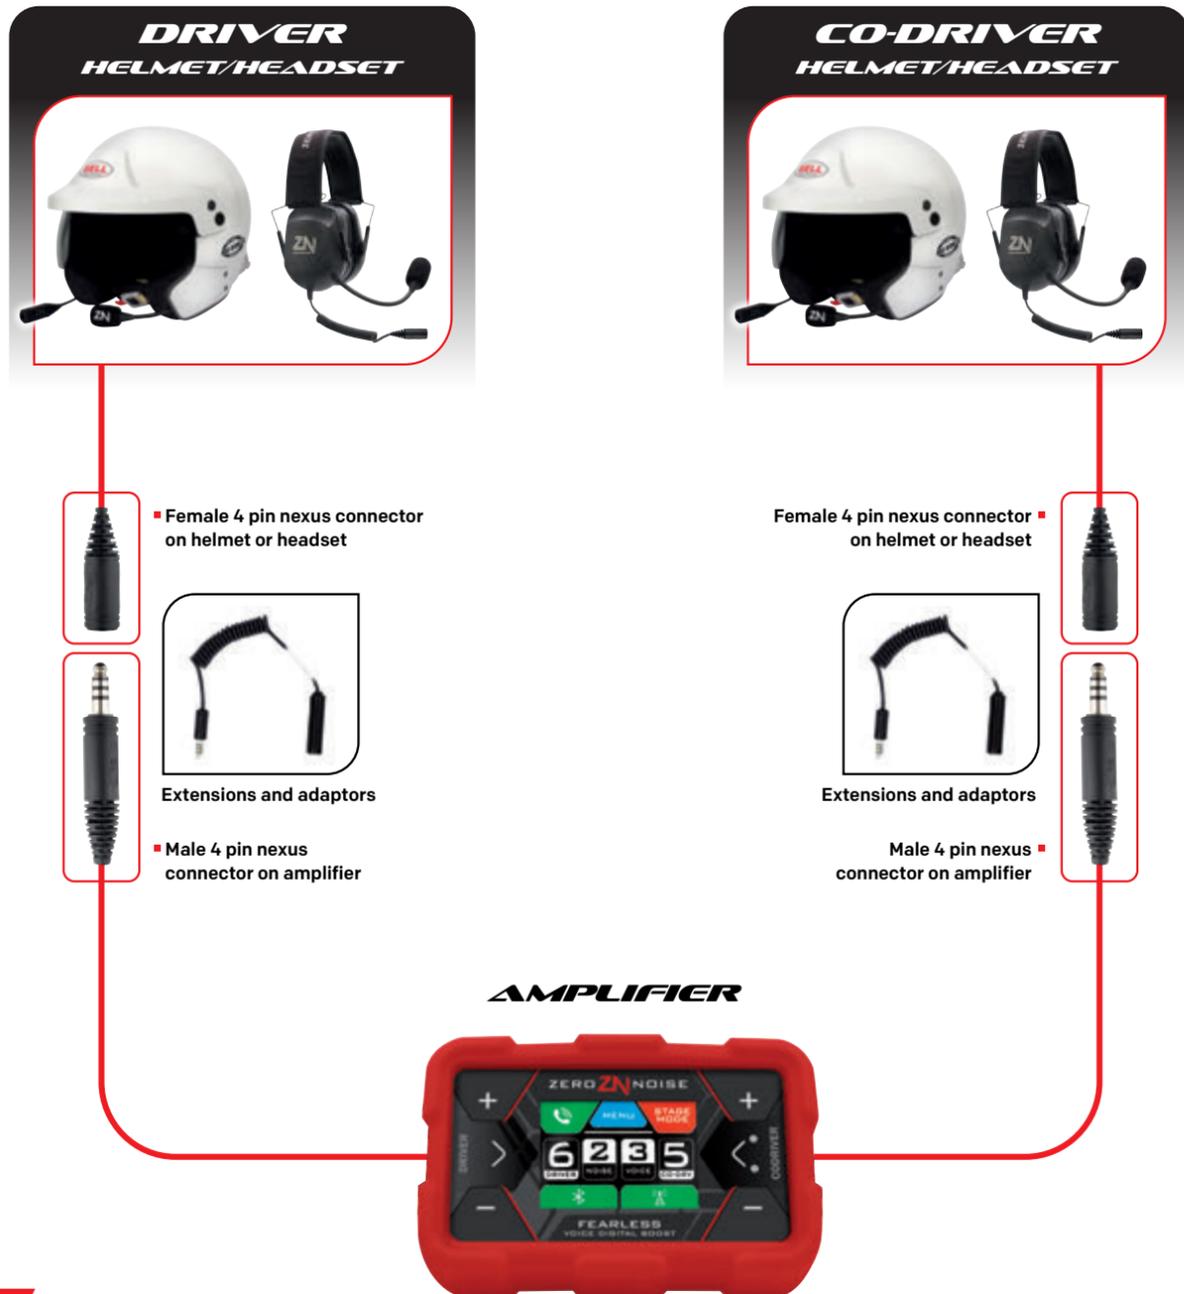

The Rally Systems enable communication between driver and co-driver with extensive Power and Noise Cancelling. They also feature radio, Bluetooth, and Car camera connection.

COMPONENTS

- Amplifiers
- Helmet radio kits
- Headsets
- Extensions and adaptors (if needed for different connector systems, e.g. components produced by other manufacturers)

SYSTEM ARCHITECTURE

Male 4 pin nexus connector on amplifier, female 4 pin nexus connector on helmet or headset.

COMMUNICATION SYSTEM

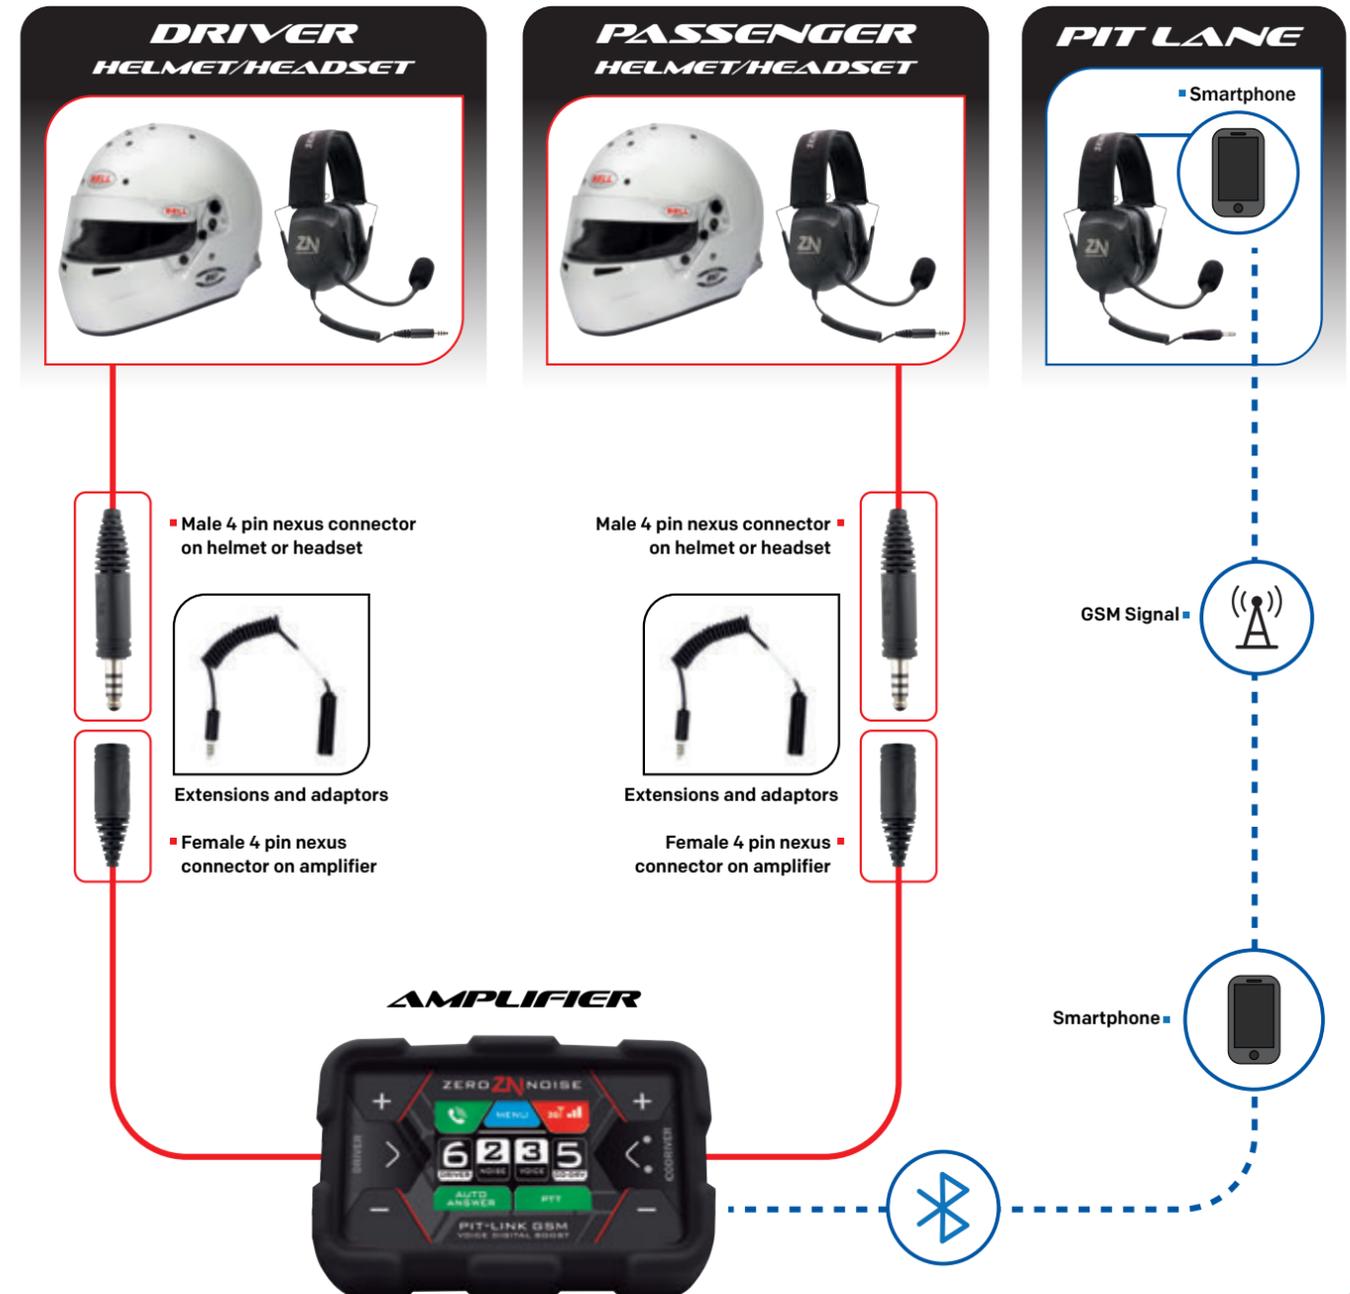

The Circuit Systems enable communication between the car and the pit with a standard phone call, through a professional intercom system connected via bluetooth to the smartphone, as well as in-car communication between driver and co-driver/instructor. PIT LINK allows you to connect up to two people in the car, as well as more cars and more people at the pit by using the conference call feature of the smartphone.

COMPONENTS

- Pit link GSM amplifier
- Helmet radio kits
- Headsets for driver or co driver
- Extensions and adaptors (if needed for different connector systems, e.g. components produced by other manufacturers)
- Pit Link headset for the pit crew
- PTT button for call

SYSTEM ARCHITECTURE

Female 4 pin nexus connector on amplifier, male 4 pin nexus connector on helmet or headset.

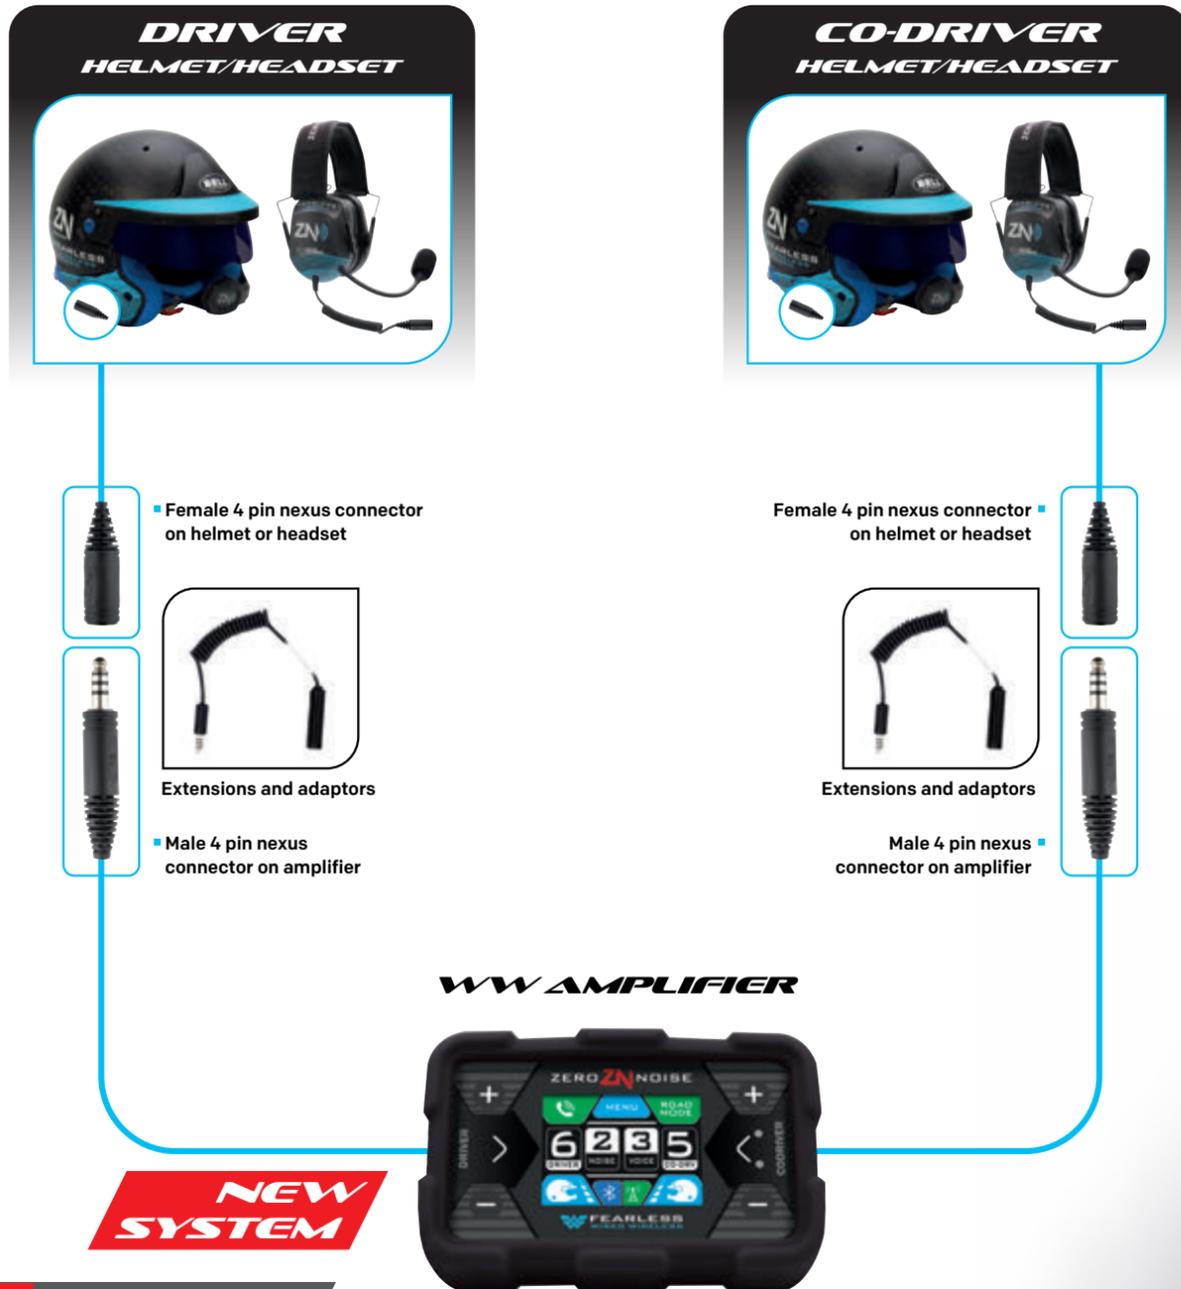

The Wired-Wireless (WW) System enables communication between driver and co-driver both in Wired and Wireless mode. When the helmet IS connected to the amplifier via cable, the communication works traditionally, also keeping compatibility with any Nexus communication system.

COMPONENTS

- WW Zeronoise Amplifier
- WW Bell Helmet radio kits / Helmet radio kits produced by other manufacturers
- WW Zeronoise Headsets / Headsets produced by other manufacturers
- Extensions and adaptors (if needed for different connector systems, e.g. components produced by other manufacturers)

SYSTEM ARCHITECTURE

Male 4 pin nexus connector on amplifier, female 4 pin nexus connector on helmet or headset.

When the helmet IS NOT connected to the amplifier via cable, the system switches automatically to the wireless mode with no interruption whatsoever.

COMPONENTS

- WW Zeronoise Amplifier
- WW Bell Helmet radio kits
- WW Zeronoise Headsets

SYSTEM ARCHITECTURE

Wireless connection.

THE WW SYSTEM MAINTAINS COMPATIBILITY WITH ANY NEXUS COMMUNICATION SYSTEM

FEARLESS WW is the revolutionary Zeronoise amplifier that combines wired and wireless communication using the ZN adaptive noise cancelling algorithm. The system ensures a smooth transition between wired and wireless mode as the intercom automatically switches to the most efficient way to manage the communication between driver and co-driver, inside and outside the car.

The amplifier display shows all relevant information: battery level, connection status, sound settings and more. It works wirelessly with selected models of Bell Rally helmets, but it is fully compatible with any helmet in the market that features a standard Nexus connector. The military grade technology on which Fearless Wireless is based, makes sure all communications are encrypted, reliable, and able to work in any environment.

- WIRED and WIRELESS communication
- Adaptive Noise Cancelling
- Multifunction touch display (It works with gloves)
- Bluetooth
- Anti shock, anti vibration silicon cover
- USB-C Port
- Audio Out for car camera
- Audio IN/OUT radio connection
- Dual volume adjustment
- 12V Filtered power cable
- Easy fix system on roll bar or dashboard
- Male 4 PIN Nexus

FEARLESS WW MAINTAINS COMPATIBILITY WITH ANY NEXUS HELMET / HEADSET

ZERONOISE WW HEADSET provides high hearing protection while being comfortable and lightweight. It integrates the WW technology, therefore it works both in Wired and Wireless mode.

The high efficiency speakers are suitable for a conversation or listening to music. It also features a dynamic noise cancelling microphone and an adjustable flex boom.

It is fully compatible with all ZERONOISE AMPLIFIERS.

NEW

- Integrated WW technology
- High efficiency speakers for music or voice
- Dynamic noise cancelling microphone Flex boom to adjust microphone
- High hearing protection
- Soft adjustable headband
- Optional cable available only Female 4 PIN Nexus version

NEXUS CONNECTOR

FEARLESS is the ZERONoise DIGITAL amplifier with its unique adaptive noise cancelling algorithm and sound comfort. Today used by more than 50% of the drivers in WRC, the electronics, look, and usability, make it the finest digital intercom in the market. A state of the art digital processor performs the adaptive noise cancelling and further sound settings are available. The display, in combination with the multifunction buttons, makes FEARLESS intuitive to use. FEARLESS' modern design is enhanced by the anti shock and anti vibration silicon cover. It is compatible with any helmet intercom kit with Nexus connectors, although the system delivers best performances with the ZERONoise intercom kit range. It is fully compatible with all ZERONoise INTERCOMS KIT/HEADSET.

- Digital active noise filtering
- Multifunction touch display (It works with gloves)
- Bluetooth
- Anti shock, anti vibration silicon cover
- USB-C Port
- Audio Out for car camera
- Audio IN/OUT radio connection
- Dual volume adjustment
- 12V Filtered power cable
- Easy fix system on roll bar or dashboard
- Available with three different connectors:
 - Male 4 PIN Nexus
 - Female 4 PIN Nexus
 - Female 4 PIN Nexus (comp. IMSA)

FURY is the new digital amplifier that makes the incomparable quality of Zeronoise adaptive noise cancelling available to all drivers. FURY combines the digital sound quality with the simplicity of use. The four pre-set buttons had been carefully designed to refine the sound in any condition. They both work independently or combined.

Presets:

- **TERRAIN:** The noise cancelling algorithm focusses on the noises coming from the road surface.
- **BOOST:** It enhances the voice volume output for the most demanding drivers.
- **ENGINE:** This pre-set is effective on the noises coming from the engine.
- **ROAD/STAGE:** Stage mode turns off the radio output, so the communication is solely between drive and co-driver for maximum focus.

- Adaptive noise cancelling
- Anti shock, anti vibration silicon cover
- USB-C Port
- Audio Out for car camera
- Audio IN/OUT radio connection
- Dual volume adjustment

PIT-LINK TRAINER SYSTEM ARCHITECTURE

PIT-LINK TRAINER is a simple and straightforward way to enable communication between the driver and the pit.

WEARABLE AMPLIFIER

6100031

- Micro Amplifier
- Super Fast Bluetooth
- Advanced Noise cancelling
- USB Port (Type C) for recharging
- Independent volume
- Long life rechargeable Internal battery

PIT-LINK TRAINER is the micro amplifier designed to be the perfect communication tool for karting. PIT-LINK TRAINER is a Bluetooth Digital Amplifier that allows to communicate with the pit during a training session. You can wear it around your neck and keep it inside your suit. The digital noise cancelling makes the communication smooth by reducing the noise around the driver.

Communication is automatically on when the phone call is incoming. No need to press anything. The pit crew will connect to the driver through a normal phone call. PIT-LINK TRAINER requires PIT-LINK MICROPHONE KIT and PIT-LINK EARPLUGS to be setup in the helmet.
